

Installation d'apache

j'ai télécharger le paquet source d'apache et les dependances : apr,apr-util

Etape :

-Installé les dependances:

```
tar -zxvf apr-1.7.4.tar.gz
```

puis entrez dans le paquet

```
~/apr-1.7.4$ ./configure
```

```
~/apr-1.7.4$ sudo make
```

```
~/apr-1.7.4$ sudo make install
```

```
~/apr-1.7.4$ cd ..
```

```
:~$ tar -zxvf apr-util-1.6.3.tar.gz
```

```
~/apr-1.6.3$ ./configure --with-apr=/home/mit/apr-1.7.4
```

```
~/apr-1.6.3$ sudo make~/apr-1.7.4$ ./configure
```

```
~/apr-1.6.3$ sudo make install
```

```
~/apr-1.6.3$ cd ..
```

-Installation du paquet source

```
~$ tar -zxvf httpd-2.4.59
```

```
~$ cd httpd-2.4.59
```

```
~/httpd-2.4.59$ ./configure
```

```
~/httpd-2.4.59$ sudo make
```

```
~/httpd-2.4.59$ sudo make install
```
